

## Diamond OA Sustainability Check

The radar chart below visualises the financial sustainability of your service. Each of the seven spokes on the chart represents one facet of financial health. The greater the length that your unique shape reaches along a spoke, the more sustainable your service is in that facet of its financial health. A larger shape indicates a more financially sustainable service.

We hope that this self-assessment result will provide insights into the financial sustainability of your service. Feel free to use this to support you in your work.

We invite you to revisit the self-assessment tool at any time when you or your colleagues wish to reassess your service.

Please note that this is the BETA version, so we appreciate any feedback you might give us to make this tool work better for you.

If you have any questions or feedback, please email us at [diamas@fecyt.es](mailto:diamas@fecyt.es)
